

**The Recycling Partnership**  
Building a Better Recycling System

# Strengthen America's Economy with the CIRCLE Act (H.R.4466)

The American recycling system delivers local jobs, stronger supply chains, and feeds domestic manufacturing capacity, reducing our reliance on imported materials.

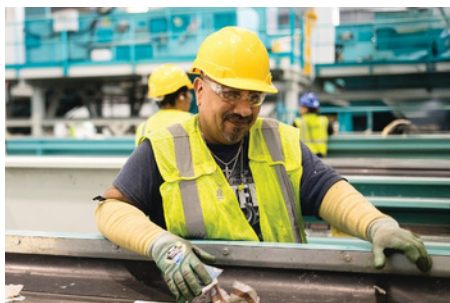

## The CIRCLE Act's Recycling Infrastructure Investment Tax Credit can deliver billions of dollars in economic value.

Our recycling system is underperforming and desperately needs investment to **give every household access to recycling services**.

The Recycling Partnership estimates **we need \$17 billion** to deliver on the promise of recycling. A promise that **8 in 10 Americans believe in**.

The Recycling Infrastructure Investment Tax Credit will **incentivize the creation of American jobs with American funds**, returning the benefits of recycling to the nation's economy.

Corporate partners are increasingly demanding high-quality recycled content, and **better infrastructure can meet their demand with a domestically sourced supply**.
